

Dave,

Thank you for your response and we also look forward to next weeks meeting. In the meantime, I want to apologize to you and Mary for the confusion I caused with my draft Agenda, and our follow-on conversation. First, my reference to the draft BO was in-artful as I did not intend to suggest that the document is legally or scientifically deficient. Instead, what I intended to focus on is the fact that the document is incomplete, and we want to support your efforts towards a complete and final product that is based upon the best available science. Second, I did not intend to suggest that the meeting be a one way conversation; rather, we view the meeting as the next opportunity to continue the discussion between Navy and USFWS as part of the on-going consultation process.

We completely understand that the final Biological Opinion will be based upon USFWS analysis of the proposed action on Guam. We want to fully understand USFWS analysis on several topics, and have a better understanding of your position regarding sections that are currently incomplete within the working draft. We also want to share with you additional data and information on the *Tuberolabium guamense* and *Marinana eight-spot* butterfly. As previously noted, we consider this meeting to be a continuation of the consultation process and we look forward to sharing with you our data and analysis.

In an effort to ensure that we are aligned, attached is a revised agenda to help guide our discussions during next weeks meeting.

Please to not hesitate to call if you have additional questions or thoughts.

Joe

Very Respectfully,
Captain Joseph A. Campbell
Office of the Assistant Secretary of the Navy (EI&E)
703.602.3924

Subject: Re: [Non-DoD Source] Navy / FWS meetings next week on Oahu

Hi All;

We are looking forward to our meeting next week. Mary and I received the draft Agenda that Captain Campbell sent this morning. After reviewing it, it became clear to us that Navy and USFWS had quite different visions for the purpose and content of the meeting. I called Captain Campbell to discuss the divergence in concepts.

I will try to lay out here my understanding of where that conversation led and where it left us with respect to next week's meeting.

First, for the record I need to make clear at the outset that the Service disagrees with the "Meeting Goal" as stated on the agenda: "A solid scientific analysis as the foundation for the biological opinion supporting the Marine Relocation to Guam and making it legally sufficient." The Service has drafted a biological opinion (BO) that is both "legally sufficient" and based on "solid scientific analyses," so we reject that as the goal of the meeting.

Captain Campbell stated in our conversation this morning that the Navy representatives will not be prepared or empowered to discuss any potential changes to their action or Reasonable and Prudent Alternatives (RPAs) that might impact the outcome of the analyses.

The purpose of the meeting then, as I understand it, is that the Navy would like to discuss the analytical framework of the draft BO, and present from their perspective, what they see as potential issues or weaknesses in that framework. Captain Campbell described the goal using the military term "red cell;" a review of a position or strategy or tactics from an "enemy's" point of view in order to identify potential vulnerabilities or flaws. Navy is offering this as a service to the FWS, and is not expecting any replies or responses from the FWS at the meeting. Navy is providing the information merely for consideration by the FWS.

For our part, FWS will be attentive to Navy's presentation, and will be happy to answer any questions or to clarify the analytical framework.

But given that the entire goal of the meeting is apparently for Navy to present their "red cell" case to FWS, I don't imagine we will require two full days as outlined in the draft agenda. I suggest instead that we plan for a one day meeting and consolidate all the agenda items and cover them Tuesday, 23 August. We can discuss at the end of that day whether there is any need for additional time.

I have attached Captain Campbell's draft agenda for those who have not yet seen it.

I look forward to talking with you all next week.

Very Best Regards,

David

Hey Dave,

Here's what I was thinking on the agenda. We can meet you at the pass office if you need a guide to the environmental building. It's on the far side of the airfield, where we met with you and Kristi last fall. You'll need driver's license, registration, and insurance to get in the base. Please add Steve or others to the attendees if I missed them. If you can confirm your list, I'll request they issue you multi-day passes.

Joe

Hi Joe,

Have you developed an agenda for next weeks meetings yet? If so, can you share it with us when you get the chance?
Thanks,
David
